4. Visualization platform
5. Conclusions and future works

Mission

**Tracking the evolution of the scientific research
along the time using a visualization platform**

1. Introduction

Papers and preprints are collected from different sources through Semantic Scholar. Released as part of CORD-19 are the harmonized and deduplicated metadata and full text JSON.

The distribution of papers per year in CORD-19. A spike in publications occurs in 2020 in response to COVID-19.

2. Dataset

CORD-19: COVID-19 Open Research Dataset [2]

- Preprocessing
 - Tokenizing abstracts
 - Customized stopwords
 - Lemmatization
 - TF-IDF

Scientific Research Visualization: A Case Study on Covid-19 Literature (G. Tasciotti — 2021)

3. Clustering - Original

CORD-19: COVID-19 Open Research Dataset

Scientific Research Visualization: A Case Study on Covid-19 Literature (G. Tasciotti – 2021)

3. Clustering - SVD

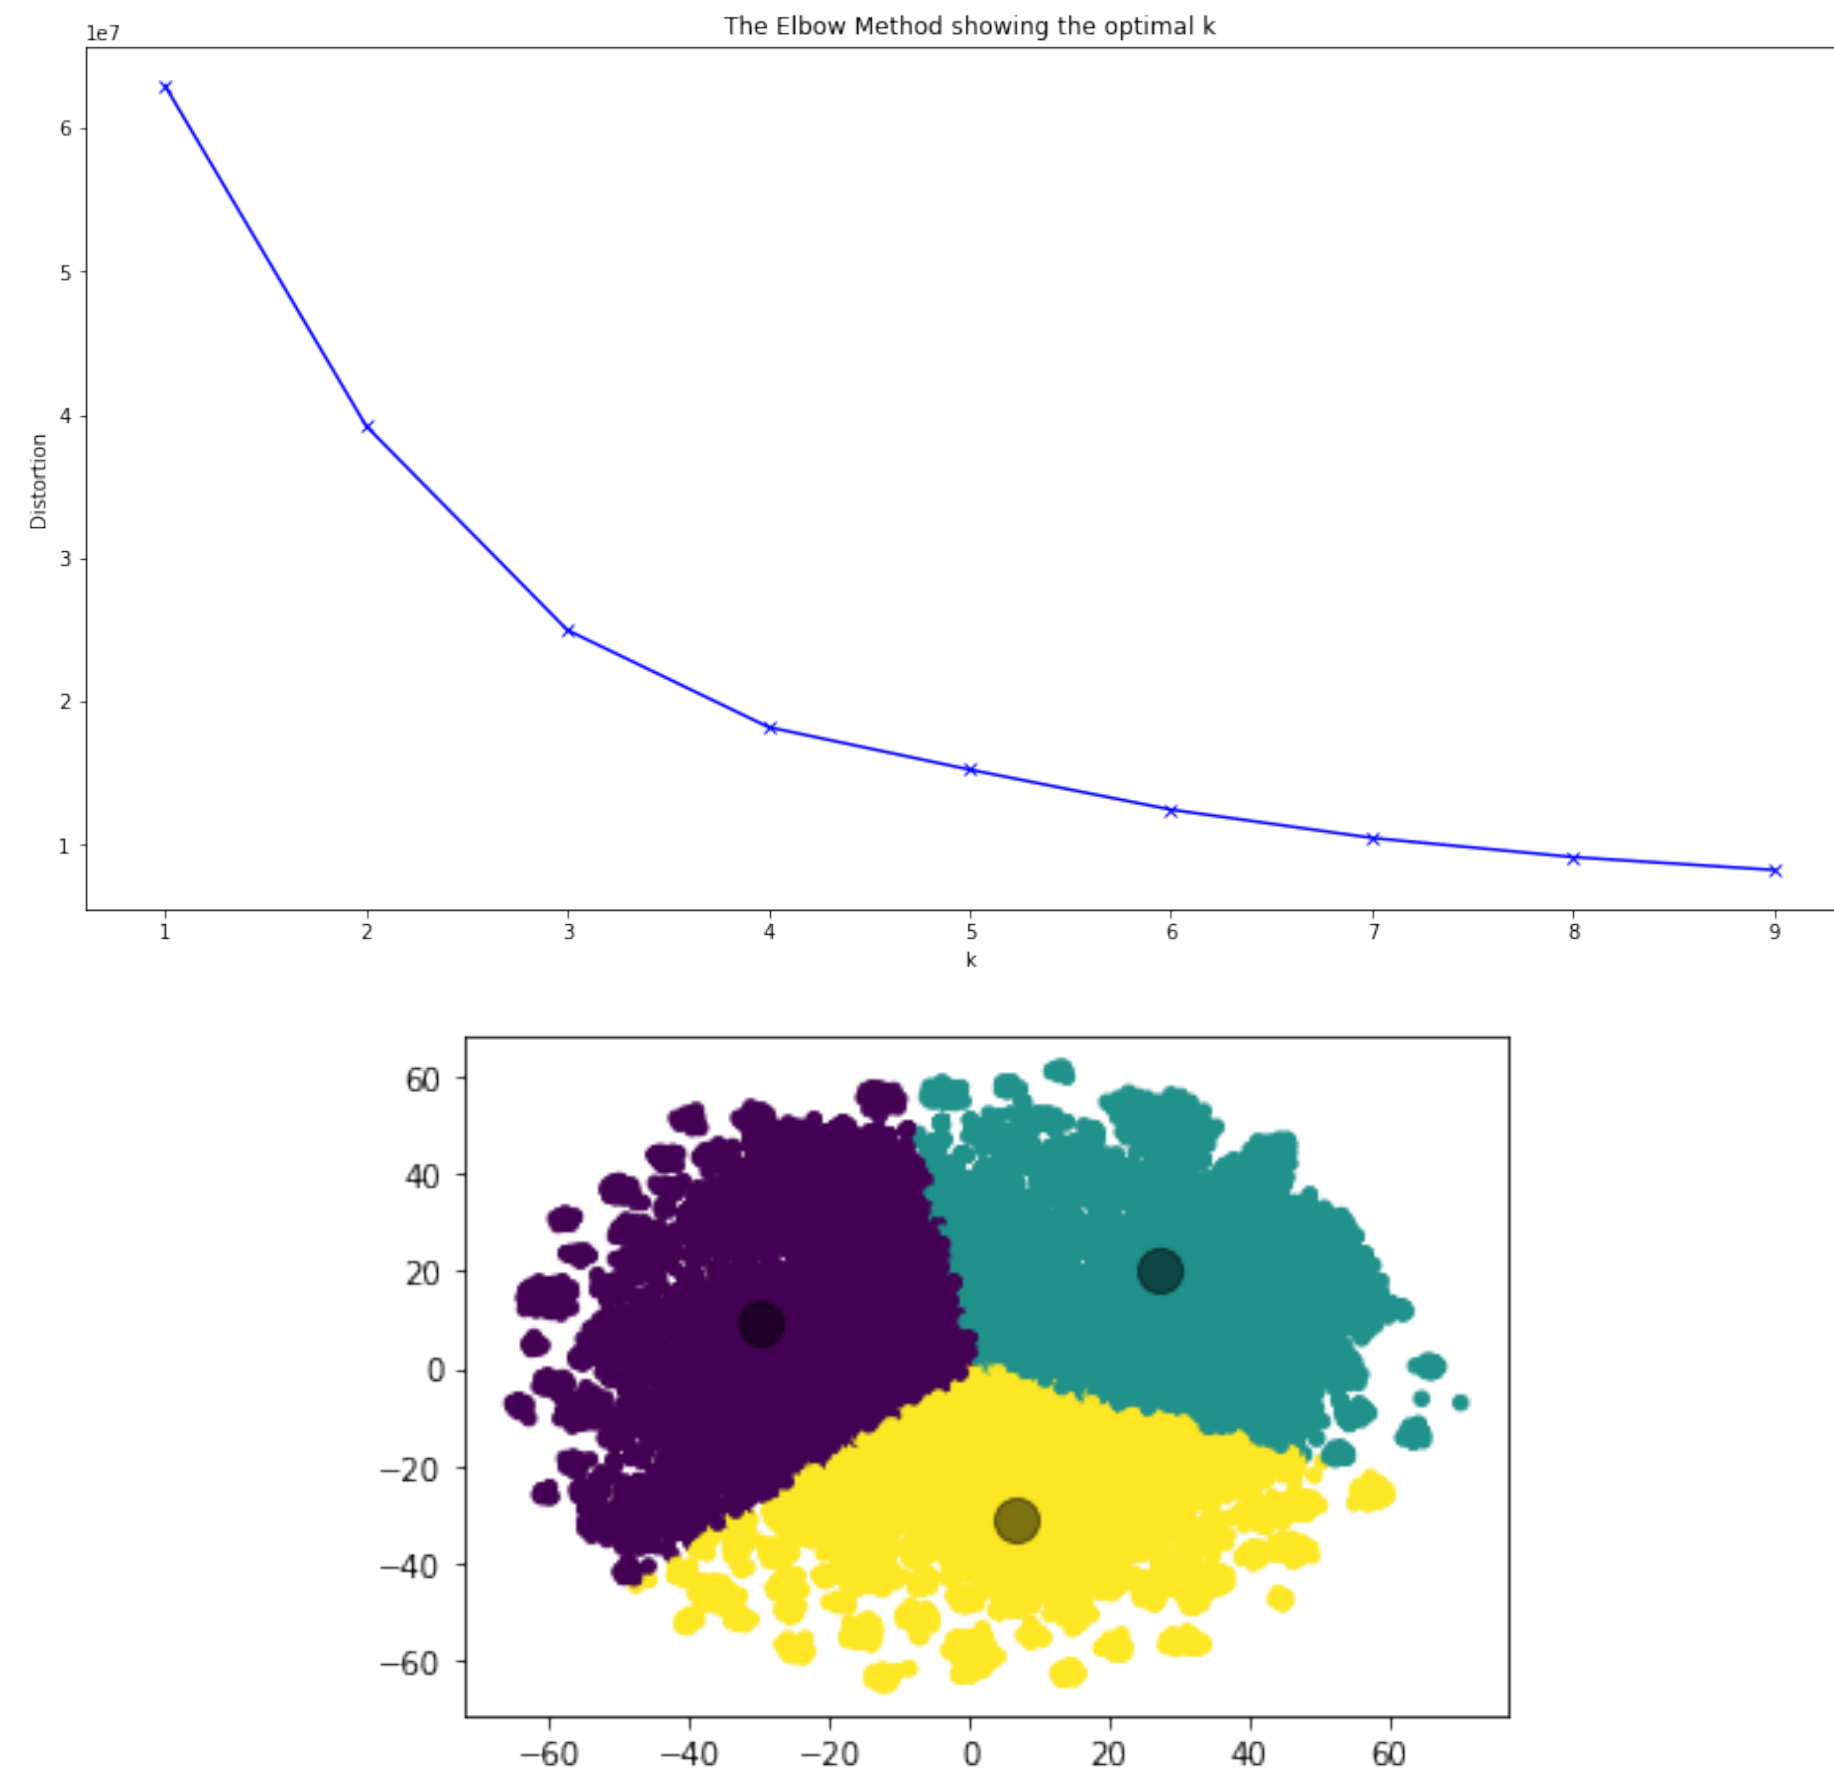

CORD-19: COVID-19 Open Research Dataset

Scientific Research Visualization: A Case Study on Covid-19 Literature (G. Tasciotti – 2021)

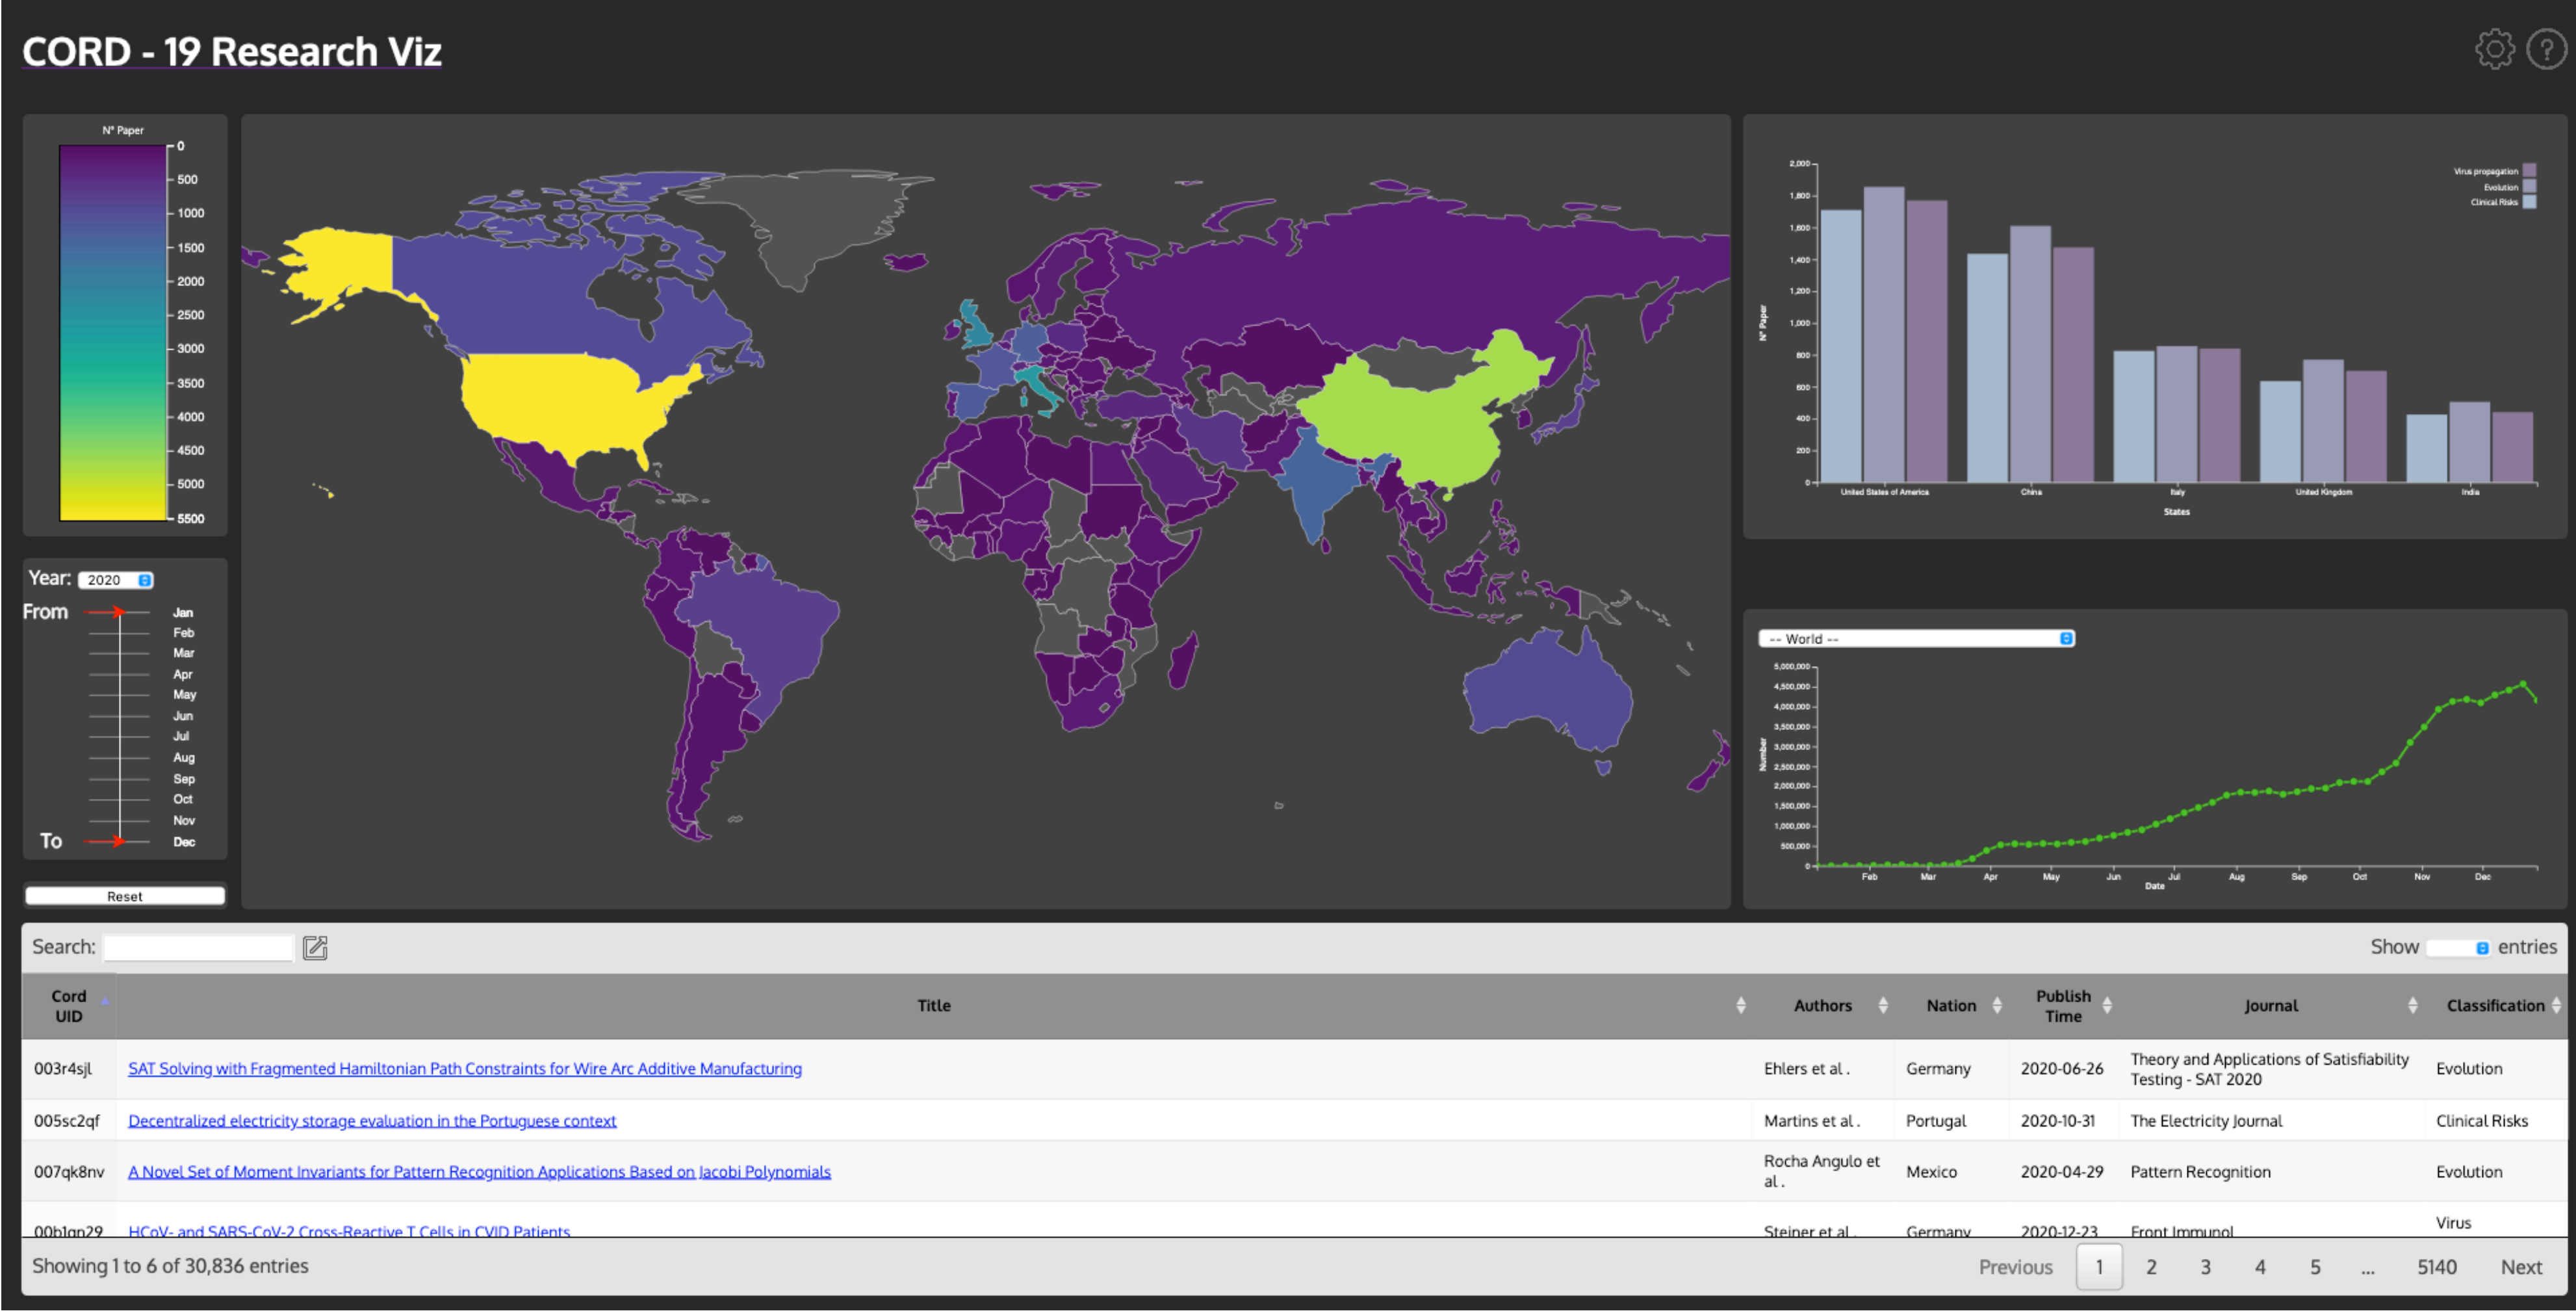

3. Clustering - t-SNE

CORD-19: COVID-19 Open Research Dataset

Scientific Research Visualization: A Case Study on Covid-19 Literature (G. Tasciotti – 2021)

4. Visualization platform

Scientific Research Visualization: A Case Study on Covid-19 Literature (G. Tasciotti — 2021)

4. Visualization platform - Demo

Scientific Research Visualization: A Case Study on Covid-19 Literature (G. Tasciotti — 2021)

5. Discussion and conclusion

A different point of view to see the scientific research

Topic classification

Possible generalization

Huge amount of data

Serverless

Applying a NN

Thanks!
